Initial Internal Pressure 0.5kg/or
 "Guaranteed energy absorption" represents the guaranteed energy absorption at 60% deflection.
 Tolerane of reaction force and deflection at guaranteed energy absorption are as follows:

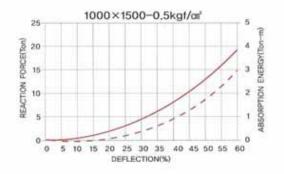

Reaction:±10% • Deflection:±5%

4. Each reaction and energy absorption are measured under static condition.
5. Testing pressure rate indicates the testing pressure at factory.
6. Weight of fender body and net may vary ±10%
7. We can manufacture the special size except the above mentioned.

PERFORMANCE CURVE

| INITIAL INTERNAL PRESSURE | DEFLEC- TION | GUARANTED ENERGY ABSORPTION | REACTION FORCE | HULL PRESSURE |
|---------------------------------|-----------------|-----------------------------------|-------------------|------------------|
| 0,5 (kg(or) | 60 (%) | 0.66 (Ton-m) | 7 (Ton) | 13,4 (tt/m²) |

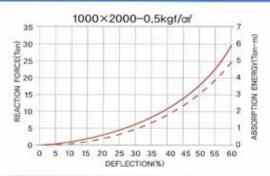

| INITIAL INTERNAL PRESSURE | DEFLEC- TION | ENERGY ABSORPTION | REACTION FORCE | HULL PRESSURE |
|---------------------------------|-----------------|----------------------|-------------------|------------------|
| 0.5 (kgtar) | 60 (%) | 3.0 (Ton-m) | 18.2 (Ton) | 12,3 (tt/m²) |

COMPRESSION TEST

30%

60%

PHYSICAL PROPERTY OF RUBBER

| | | Test Item | Outer-Layer Rubber | Cord Rubber and Inner Layer Rubbe |
|-----------------------|------------------|--------------------------|---------------------------------------|-----------------------------------|
| | | Tensile strength | Over 180kg/ar | Over 100kgt/or |
| Physical before aging | Elongation | Over 400% | Over 400% | |
| | aging | Hardness | Under 70° | Under 65 ^d |
| Propety | | Tear resistance | Over 40kg/cn | |
| test after | Tensile strength | Over 80% of value of the | before aging | |
| | after | Elongation | Over 80% of value of the before aging | |
| | erflintfi. | Hardness | Under +8" of value of the | before aging |

- The physical test upper mentioned is according to JIS K6301-1994.
 And about the same size, in the case of being identify the test method about over the two kinds, adopt the under mentioned methods.
- hardness test: Spring type hardness test (A type)
 aging test: air heating aging test

test temperature : 70 ± 1 °C test time : 96 hours

Features

- High energy absorption with lower reaction force.
 Performance adjustable by varying initial pressure.
 Low maintenance.

- 4. Suitable for areas with large or small tides
- 5. Optional chain net & tires for heavy duty applications
