Artificial lift — rod-pump diagnostics

Sucker-rod-pump dynamometer-card (dynacard) diagnostics — surface-to-downhole wave-equation solvers, an 18-mode failure-signature library plus a 336-card example library, ML card classification with a CI drift-guard on every published diagnosis, recommended controller setpoints & alarms, and a field-wide health screen.

WHAT YOU GET

- Troubleshooting use cases: card signature → ML diagnosis → field response
- Example-card library: synthetic-verified, measured field wells, digitized archive
- POC setpoints & alarms recommended per well from its own card
- Field-wide per-well health ranking with a fail-closed screening verdict
