
AQWA · OrcaWave · canonical spec

Diffraction deck generation — spec to solver input

One canonical vessel spec (YAML) deterministically prepared into a solver-ready AQWA diffraction deck offline; the OrcaWave solve runs on the licensed lane with provenance carried through.

WHAT YOU GET

- Solver-ready AQWA .dat deck prepared offline from one spec
 - OrcaWave solve on the licensed lane, same canonical spec
 - Deterministic registry workflow, durable-workflow tested
-
