

API 579-1 · ASME B31G · DNV-RP-F101

Fitness-for-service

Remaining-strength assessment of corroded and metal-loss components with an inspector decision layer — benchmarked to standard worked examples and published ratings across the three governing FFS codes.

WHAT YOU GET

- Remaining-strength and inspector-verdict walkthrough across API 579-1, ASME B31G and DNV-RP-F101
- Accept / re-rate / take-more-measurements / escalate driven by measurement sufficiency
- RSTRENG effective-area and B31G screens validated to published worked examples
