

Mooring resilience screen

Intact / one-line-damaged tension, anchor-foundation and chain-fatigue checks composed from the pre-computed mooring and anchor atlases into a single traffic-light — out-of-range cases are escalated, never extrapolated.

WHAT YOU GET

- Intact 1.67 / damaged 1.25 ASD factors per API RP 2SK
- Anchor-foundation check at 1.5 per DNV-OS-E301 practice
- GREEN / AMBER / RED / ESCALATE traffic-light per case

Ask Deckhand: “Run the mooring resilience screen (intact / damaged / foundation / fatigue) for my spread-moored unit.” — send to @the_deckhand_bot to run it live.
