Vessel Capability GTM PDF Pack

Client-ready digitalmodel collateral
generated 2026-05-07

Use today: send the operation-specific PDF most relevant to the prospect, or send the full bundle after confirming source/reuse caveats for reference material.

Included PDFs

1. **03_mudmat_installation_vessel_capability_digitalmodel.pdf**
2. **04_shallow_pipelay_vessel_capability_digitalmodel.pdf**
3. **05_rigid_jumper_installation_vessel_capability_digitalmodel.pdf**
4. **06_ctv_access_operability_kincardine_digitalmodel.pdf**

Best-fit prospect routing

- **Subsea installation / heavy-lift:** mudmat and rigid jumper PDFs.
- **Pipeline contractors:** shallow-water pipelay PDF.
- **O&M / floating wind / access planning:** CTV access-operability PDF.

Caveats

- Representative/class-typical vessel data is for GTM demonstration, not final engineering.
- CTV monthly values are image-derived approximations; preserve SeaOps Solutions attribution and confirm reuse rights.
- For project execution, replace representative values with owner-approved vessel data, certified RAOs, and native metocean.
