
Gibbs wave equation · Bezerra projections · 18 failure modes

Dynacard troubleshooting explorer

Seven practical rod-pump troubleshooting cases — gas interference, fluid pound, valve leak, pump tagging, parted rods, gas lock — each with the card signature, ML diagnosis, load metrics and the recommended field response.

7

use cases

7/7

CI-verified diagnoses

WHAT YOU GET

- Pump-card signature per failure mode with a healthy-reference overlay
- ML classification with confidence and top-3 differential
- Fluid load, peak/min load and card-area metrics plus field actions
- Every published diagnosis re-verified against the live classifier in CI

Ask Deckhand: “Diagnose this rod-pump dynamometer card - failure mode, confidence and what to do about it.”
— send to @the_deckhand_bot to run it live.
