Artificial lift — rod-pump diagnostics

Sucker-rod-pump dynamometer-card (dynacard) diagnostics — surface-to-downhole wave-equation solvers, an 18-mode failure-signature library, ML card classification with a CI drift-guard on every published diagnosis, and a field-wide health screen.

WHAT YOU GET

- Troubleshooting use cases: card signature → ML diagnosis → field response
 - Gibbs frequency-domain and finite-difference surface-to-downhole solvers
 - Field-wide per-well health ranking with a fail-closed screening verdict
-
